Katia Fabrics:

Inspiring creativity

ES

AQUA es el título de la colección SS20 de Katia Fabrics, inspirada en el agua como elemento esencial para las personas así como para el resto de seres vivos que habitan la Tierra. Agua somos y agua necesitamos. Un recurso vital al que estamos conectados desde el vientre materno y que nos acompaña a lo largo de nuestra vida. AQUA nos invita a chapotear entre originales prints en los colores más frescos de la paleta cromática, recordándonos la importancia de este bien natural.

En verano lo que apetece es vestir prendas ligeras y confortables. La colección de Katia Fabrics pone a tu alcance tejidos que son ya marca de la casa como el popelín, jersey, denim, canvas y felpa.

Además, incorporamos a nuestra colección de verano la muselina suave y fresca para los más peques y nuestro waterproof de verano que tanto gustó en la última temporada de invierno.

EN

AQUA is the title of the Katia Fabrics SS20 collection. It is inspired by water, an essential element required by humans and all other living creatures that inhabit the earth. Water is both what we are and what we need. We connect to this vital resource in the maternal womb and it accompanies us throughout the rest of our lives. AQUA invites us to splash around between original prints that feature the freshest of colours from a chromatic palette. It also reminds us of the importance of this natural asset.

During the summer one wants to wear light and comfortable clothing. The Katia Fabrics collection brings you a selection of fabrics that are already brand classics like poplin, jersey, denim, canvas and sweat fabric. Furthermore, we are introducing a soft, lightweight muslin to our summer collection for the tiny tots. Plus our summer version of the waterproof fabric that was such a success in our last winter collection.

DE

AQUA ist der Titel der Kollektion Frühjahr/Sommer 2020 von Katia Fabrics, inspiriert vom Wasser als lebenswichtiges Element des Menschen und aller Lebewesen auf der Erde. Denn ohne Wasser gibt es kein Leben. Es ist eine unentbehrliche Ressource, mit der wir bereits im Mutterleib verbunden sind und die uns das ganze Leben lang begleitet. AQUA lädt uns zum Planschen ein -zwischen originellen von Katia entworfenen Designs in den frischesten Farben- und erinnert uns somit daran, wie wichtig dieses natürliche Gut ist.

Im Sommer trägt man am liebsten leichte und bequeme Kleidung. Die Kollektion von Katia Fabrics bietet dir Stoffe, die bereits unser Markenzeichen sind, wie Popeline, Jersey, Denim, Canvas und Sweat.

Außerdem haben wir einen weichen, frischen Musselin für die Kleinsten mit in unsere Sommerkollektion aufgenommen, sowie einen wasserfesten Stoff für den Sommer, da dieser in der Winterkollektion besonders gut ankam.

IT

AQUA è il nome della collezione SS20 di Katia Fabrics, ispirata all'acqua quale elemento indispensabile per le persone, così come per il resto degli esseri viventi che abitano sulla Terra. Acqua siamo e di acqua abbiamo bisogno. Una risorsa vitale a cui siamo collegati fin dal ventre materno e che ci accompagna per tutta la vita. AQUA ci invita a sguazzare tra le stampe originali nei colori più freschi della tavolozza, ricordandoci l'importanza di questo bene naturale.

In estate, quello che desideri è indossare abiti comodi e leggeri. La collezione Katia Fabrics mette a portata di mano tessuti che sono già marchi di casa come il popeline, il jersey, il denim, il canvas e il felpato. Inoltre, incorporiamo nella nostra collezione estiva la morbida e fresca mussolina per i più piccoli e il nostro waterproof estivo che è stato molto apprezzato nell'ultima stagione invernale.

FR

AQUA est le nom de la collection SS20 de Katia Fabrics, qui trouve son inspiration dans l'eau en tant qu'élément essentiel pour tous les êtres vivants sur la Terre. Nous sommes Eau et nous avons besoin d'Eau. C'est une ressource vitale à laquelle nous sommes déjà connectés dans le ventre maternel et qui nous accompagne tout au long de notre vie. AQUA nous invite à nous baigner entre les motifs originaux et exclusifs de Katia, disponibles dans des coloris rafraîchissants et qui nous rappelle l'importance de ce bien naturel.

En été, ce dont nous avons toutes et tous envie est de porter des vêtements légers et confortables. La collection de Katia comprend des tissus qui font déjà partie de nos classiques comme la popeline de coton, le tissu jersey, le denim, le canvas et le tissu molletonné. De plus, nous y ajoutons une mousseline douce et fraîche pour les plus petits et une version estivale de notre tissu waterproof qui vous a tellement plu cet hiver.

NE

AQUA is de titel van de SS20-collectie van Katia Fabrics, geïnspireerd door water als essentieel element voor mensen en voor de rest van levende wezens die de aarde bewonen. Water is wat we zijn en water is wat we nodig hebben. Een vitale hulpbron waarmee we verbonden zijn vanuit de baarmoeder en die ons ons hele leven vergezelt. AQUA nodigt ons uit om tussen originele prints in de meest frisse kleuren van het kleurenpalet te spatten, wat ons herinnert aan het belang van dit natuurlijke goed.

In de zomer willen we lichte en comfortabele kleding dragen. Met de Katia Fabrics-collectie heb je binnen handbereik stoffen die reeds een huismerk zijn, zoals popeline, tricôt, denim, canvas en pluche. Bovendien nemen we in onze zomercollectie zachte en frisse mousseline op voor de kleintjes en onze waterproof voor de zomer, erg gewild in het afgelopen winterseizoen.
